

## APPENDIX

### IN THE CLAIMS:

1. (Twice Amended) An apparatus for capturing information from a substrate, comprising:

means for providing a viewing area for assisting a user in positioning the apparatus over a particular area of the substrate; and

means for capturing coded embedded data from the surface of the substrate, said embedded data including an [related to the] orientation of the substrate and a location of the coded embedded data on the substrate.

17. (Twice Amended) A method for capturing information from a substrate using an apparatus having a viewing area for assisting a user in positioning the apparatus over a particular area of the substrate, comprising:

positioning the apparatus over a particular area of the substrate using the viewing area; and

capturing coded embedded data from the surface of the substrate, said embedded data including an [related to the] orientation of the substrate and a location of the coded embedded data on the substrate.
